Ian Lizarraga

Contact Information

489 Carslaw Building
Mathematics Department
University of Sydney
Camperdown 2006, NSW
Australia

Email: ian.lizarraga@sydney.edu.au
Homepage: https://ianlizarraga.github.io/

Academic Positions

2018–2022 Postdoctoral Fellow
University of Sydney School of Mathematics and Statistics
Supervisors: Martin Wechselberger & Robert Marangell

2017–2018 Visiting Assistant Professor
Cornell University Math Department

Education

2011–2017 PhD in Applied Mathematics
Cornell Center for Applied Mathematics
Advisors: John Guckenheimer & Steven Strogatz

2008–2011 BA in Mathematics and Honors Physics
Northwestern University
Thesis advisor: Frederic Rasio

Research Interests

Geometric singular perturbation theory, model reduction in coupled oscillators, computational techniques for invariant manifolds

Publications and Projects

Preprints and drafts are available on ***https://ianlizarraga.github.io/***

- **I.L.** and T. Vo, *Spatiotemporal canards and trigger waves in reaction-diffusion equations*, in progress (2020)
- **I.L.** and M. Wechselberger, *Delayed and singular Hopf bifurcations in nonstandard slow-fast systems*, in progress (2020)
- **I.L.**, B. Rink, and M. Wechselberger, *Parametrisation method for multiple-timescale dynamical systems*, in prep. (2020)
- **I.L.**, R. Marangell, and M. Wechselberger, *Slow Unfoldings of Contact Singularities in Singularly Perturbed Systems Beyond the Standard Form*, J. Nonlinear Sci. (2020)
- **I.L.** and M. Wechselberger, *Computational singular perturbation method for nonstandard slow-fast systems*, SIADS 19-2 (2020)
- **I.L.**, *Modeling mixed-mode oscillations near a tangency of slow manifolds*, preprint available on homepage, accepted to Chaos (2019)
- J. Guckenheimer and **I.L.**, *Shilnikov homoclinic bifurcation of mixed-mode oscillations*, SIAM J. Appl. Dyn. Syst. 14-2 (2015)
- I. Kloumann, **I.L.**, and S. Strogatz, *Phase diagram for the Kuramoto model with van Hemmen interactions*, Physical Review E 89, 012904 (2014)
- J. Teyssandier, S. Naoz, **I.L.**, and F. Rasio, *Extreme orbital evolution from hierarchical secular coupling of two giant planets*, The Astrophysical Journal 779 166 (2013)

Theses

- *Complex Mixed-Mode Oscillations and a Search for Oscillator Glass*, Cornell University Ph.D. Thesis (2017)
- *Secular Dynamics of Three-Body Systems and the Origins of Retrograde Hot Jupiters*, Northwestern University Senior Thesis (2011)

Talks

2020 Mar	VIC-Anziam Lecture, University of Melbourne, Australia† (postponed due to COVID-19 pandemic)
2020 Mar	Applied Maths Seminar, Monash University, Australia† (postponed due to COVID-19 pandemic)
2020 Feb	ANZIAM, Hunter Valley, NSW, Australia
2019 Dec	Applied Maths Seminar, UNSW, Australia†
2019 Nov	SDG Conference, Margaret River, WA, Australia
2019 July	Equadiff, Universiteit Leiden, Netherlands†
2019 July	Edinburgh Slow-Fast-Ival Workshop, Edinburgh, UK
2019 May	SIAM Conference on Dynamical Systems, Snowbird, UT, USA
2019 Feb	ANZIAM, Nelson, New Zealand
2018 Nov	SDG Conference, Blackheath, NSW, Australia
2018 Oct	Sydney Dynamics Group Seminar†, Sydney, NSW
2017 Aug	Cornell University Applied Math Talk, Ithaca, NY, USA
2015 May	SIAM Conference on Dynamical Systems†, Snowbird, UT, USA
2015 Mar	Cornell Dynamical Systems Seminar, Ithaca, NY, USA
2014 Jul	SIAM Annual Meeting, Chicago, IL, USA
2013 Nov	Cornell SCAN Seminar, Ithaca, NY, USA†
2012 Dec	Cornell Topics in PDEs Seminar, Ithaca, NY, USA

[† invited talks]

Honors and Awards

2019	Robert Bartnik Visiting Fellowship, Monash University
2019	Accommodation Funding, TU Munich, Germany Dynamics & Geometry Summer School
2014	SIAM Student Travel Award
2011	Cornell University Graduate Research Fellowship
2011	Magna cum laude, Phi Beta Kappa, Sigma Pi Sigma
2011	Rhodes Scholarship finalist
2011	CIERA Summer Research Funding (PI: Fred Rasio)
2010	Belize Ministry of Education Senior Fellowship (USD 20,000)
2010	Northwestern University Summer Research Grant
2010	Oak Ridge National Laboratory Summer Biophysics Grant
2009	NSF Summer Research Funding (PI: Adilson Motter)
2008	Belize Ministry of Education CAPE First Prize (USD 40,000)

Teaching

Instructorships

2020 Sem 1	Math 3063: Differential Equations with Applications to Biology (120 students)
2019 Sem 1	Math 3063: Differential Equations with Applications to Biology (120 students)
2018 Sp	Math 1110: Calculus I (60 students)
2017 Fa	Math 1120: Calculus II (60 students)

TA: Teaching Assistantship; GA: Grading Assistantship

2017 Sp	TA	Math 2210: Multivariable Calculus
2016 Fa	TA	Math 2940: Linear Algebra for Engineers (Head TA for 15 sections and ∼450 students)
2016 Su	GA	Math 1110: Calculus I
2016 Sp	TA	Math 1106: Calculus for the Life and Social Sciences
2015 Fa	TA	Math 2210: Linear Algebra
2015 Sp	TA	Math 2940: Linear Algebra for Engineers
2014 Fa	GA	Math 4200: Diff Eqs. and Dynamical Systems
2013 Sp	GA	MAE 5780: Nonlinear Dynamics and Chaos
2012 Fa	TA	Math 1910: Single Variable Calculus

Refereeing

I have served as a referee for Nonlinearity, CHAOS, DCDS-B, and Physica D.

Service

2020 – 2021	Organizer, Matrix Institute Workshop on Multiple-Timescale Dynamical Systems, Creswick, Victoria, Australia
2019	Organizer, USyd Applied Mathematics Seminar
2019	Organizer, SIAM DS19 (two minisymposia, 11 speakers total)
2012 – 2015	President, Cornell SIAM Student Chapter
2012 – 2013	Member, CAM Minority Student Forum
2010 – 2011	Service Chair, Alpha Phi Omega Service Fraternity

Computing Languages

MATLAB, Mathematica, FORTRAN, C
